## Motion: Clean Walls, Safe Streets Initiative

June 8, 2026

WE MOVE that the administration:

- Establish a Graffiti Victim Amnesty Program within the Department of Buildings & Inspections, similar to the illegal dumping/litter amnesty program, for property owners who have had their building tagged with graffiti, and in parallel report back within 60 days on alternative solutions that do not penalize the victim.
- Create a new "Taggers Restore It" ordinance similar to Philadelphia, Chicago and a lot of other cities that requires community service – specifically graffiti removal – as a part of any sentencing penalty for someone doing graffiti.
- Explore piloting anti-graffiti enforcement options to apprehend individuals doing graffiti on these properties leveraging mobile cameras, drones or other tactics.

### STATEMENT

Graffiti vandalism imposes significant financial and quality-of-life costs on Cincinnati, our neighborhoods, taxpayers, and private property owners. The City of Cincinnati, business owners, and residents spend significant resources annually on graffiti removal and remediation. Research and municipal experience have shown that rapid graffiti removal, offender accountability, and community restoration programs can reduce repeat vandalism, improve neighborhood appearance, and strengthen public safety. At the same time, the current ordinance that penalizes property owners for being victims of vandalism unfairly shifts the burden of the crime onto residents and small businesses rather than those responsible for the damage. That ordinance is causing significant hardship for multiple building owners. Many of whom are fined clean it up only to be tagged again and fined again. It's just not fair, which is why this requests the enforcement of fines be paused while alternative solutions are explored.

Many cities, including Philadelphia and Chicago, have adopted anti-graffiti strategies that emphasize restitution, mandatory community service, coordinated cleanup efforts, and enhanced enforcement tools to deter repeat offenses and restore neighborhoods.

This motion seeks to pursue a balanced approach that pauses penalties against victimized property owners, requires offenders to participate in graffiti removal as part of sentencing, and asks for an enforcement pilot that implements technology and other public safety tools to identify and apprehend individuals engaged in vandalism of public and private property. It also asks for the administration to report back on alternative solutions to penalizing graffiti victims so we can create a fairer mechanism to combat graffiti in Cincinnati.

---

Councilmember Mark Jeffrey

## Appendix

Some of the buildings that are getting repeatedly graffitied over and fined.

Subject: **School Zone Crashes & Speeding**

**REFERENCE DOCUMENT #202601370**

The City Council, at its session on May 6, 2026, referred to the following item for review and report:

**MOTION**, submitted by Councilmembers Jeffreys and Albi. **WE MOVE** that the administration produce a report in the next 60 days on the following: A list of all crashes in school zones (public, private, parochial, charter) in 2023, 2024, and 2025; Ask the Department of Transportation & Engineering (DOTE) to measure current speeding of cars in school zones before the end of the 2025/26 school year; An audit of current traffic calming measures in place in school zones.

**BACKGROUND**

The Ohio Revised Code defines a “school zone” as the portion of a street that is encompassed by projecting the school property lines to the fronting street. The Department of Transportation and Engineering (DOTE) takes a more progressive approach when analyzing safety near schools, and instead analyzes a 1,000ft circular buffer area surrounding the school. This circular buffer area is more likely to include adjacent streets that children may be using to walk or bike to school. As an example, Figure 1 shows a 1,000ft buffer area around Holy Family School in East Price Hill. The purple dots are traffic crashes that occurred between 2023 and 2025.

**Figure 1. Example Buffer Area Around School**

This circular buffer area is more likely to include adjacent streets that children may be using to walk or bike to school. As an example, Figure 1 shows a 1,000ft buffer area around Holy Family School in East Price Hill. The purple dots are traffic crashes that occurred between 2023 and 2025.

Exhibit A shows 1,000ft buffers around schools, and all traffic crashes that have taken place citywide between 2023 and 2025.

## **CRASH DATA**

In the years 2023, 2024, and 2025, there were 35,474 crashes citywide. Approximately 24% (8,563) of those crashes occurred within 1,000 ft of a school. Approximately 1% of these crashes were fatal or severe, which is slightly lower than the citywide average.

<b>Total traffic crashes 2023-2025</b>	<b># of crashes within 1,000ft of a school</b>	<b>% of total</b>
35,474	8,563	24.14%

During this three-year period, there were 957 pedestrian and bike crashes citywide; 307 of those crashes occurred within 1,000 ft of a school.

<b>Total pedestrian/bike traffic crashes 2023-2025</b>	<b># of pedestrian/bike crashes within 1,000ft of a school</b>	<b>% of total</b>
957	307	32.08%

Considering school commute hours, between the hours of 7:00am to 9:00am and 2:00pm to 4:00pm Monday through Friday, during the months of August through May (the school year), there were 5,014 crashes city wide. Twenty-six percent of those crashes (1,310) occurred within 1,000 ft of a school.

<b>Total “school commute hour” crashes 2023-2025</b>	<b># of “school commute hour” crashes within 1,000ft of a school</b>	<b>% of total</b>
5,014	1,310	26.12%

And of the total crashes during school commute hours during the school year for this three-year period, there were 176 pedestrian and bike crashes city wide. Twenty-six percent of those crashes (46) were within a 1,000 ft of a school.

<b>Total pedestrian/bike crashes within “school commute hour” 2023-2025</b>	<b># of pedestrian/bike crashes within “school commute hour” within 1,000ft of a school</b>	<b>% of total</b>
176	46	26.14%

## **SPEED DATA**

DOTe collected speed data near 6 schools on Tuesday April 28<sup>th</sup> and Wednesday April 29<sup>th</sup>. The speed limit during school arrival and dismissal times is 20mph; outside of arrival and dismissal hours the speed limit ranges from 25 to 35, depending on location. The percentage of drivers exceeding the 20mph speed limit varied between 4% and 87%. However, less than 30% of drivers exceeded 30mph, and less than 2% of drivers exceeded 40mph.

School	Data Collection Hours	% of drivers exceeding 20+ MPH	% of drivers exceeding 30+ MPH	% of drivers exceeding 40+ MPH	Speed limit outside of school arrival/dismissal
Carson School	7:10-7:55 AM 1:55-2:40 PM	16%	0.23%	0.04%	25mph
Orion Academy	7:20-8:05 AM 2:35-3:20 PM	4%	1.54%	0.64%	30mph
Aiken HS	7:30-8:15 AM 2:45-3:30 PM	29%	0.25%	0.00%	35mph
Woodward HS	7:45-9:05 AM 3:35-4:20 PM	87%	27%	1.01%	35mph
Withrow HS	7:30-8:15 AM 2:45-3:30 PM	79%	30%	1.11%	35mph
Dater	8:40-9:25 AM 3:25-4:10 PM	72%	17%	0.47%	35mph

### **IMPROVEMENTS NEAR SCHOOLS**

Exhibit B lists the location of existing and planned curb extensions, speed humps, speed cushions, raised crosswalks, leading pedestrian signal phasing, and school flashers in close proximity to schools.

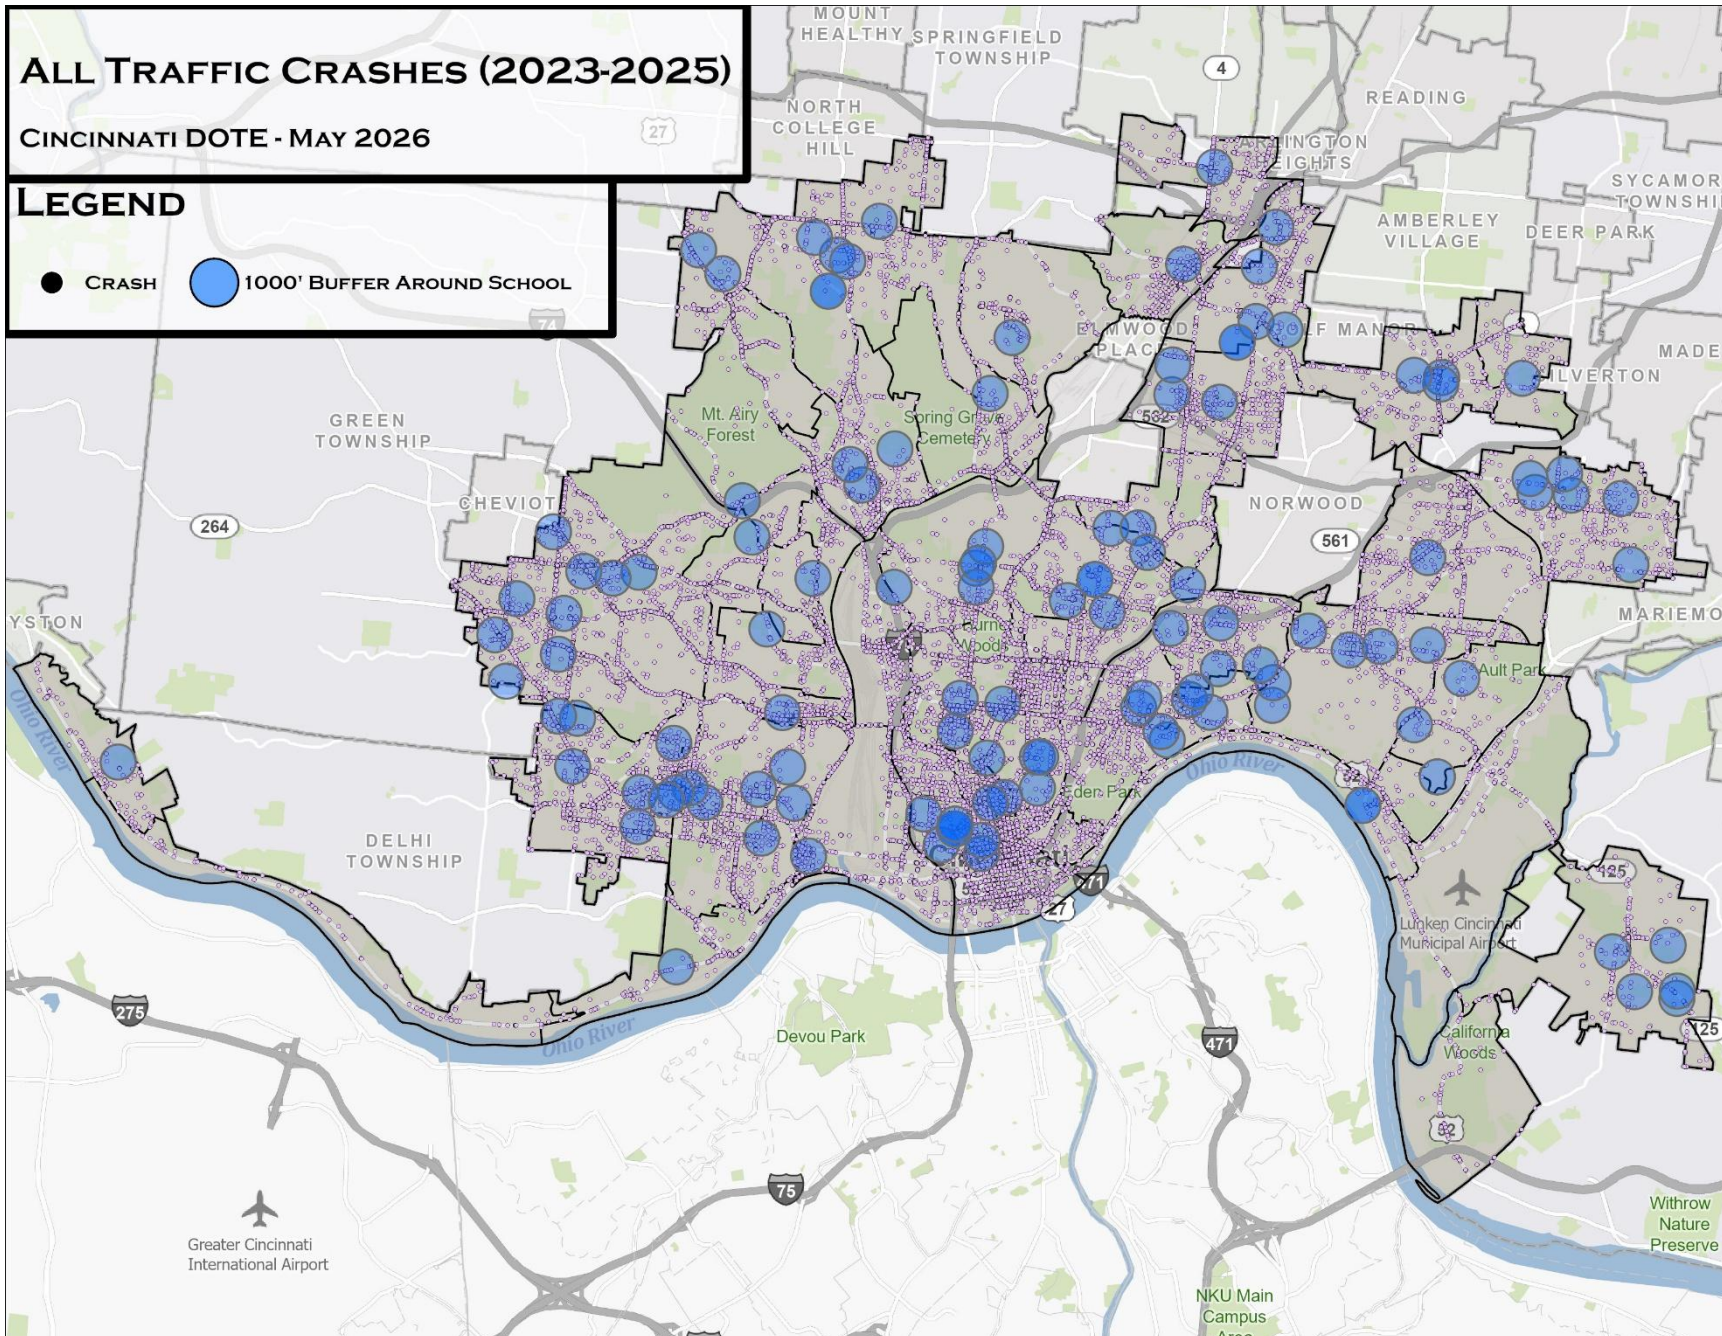

Due to the large number of traffic calming requests DOTE receives annually, the department has developed a competitive Traffic Calming Program that targets locations where pedestrians are most at risk of being involved in a crash. The program scoring criteria includes: speed data, crash data, transit data, equity data, and proximity to pedestrian generators such as schools, parks, and recreation centers.

In addition to the competitive by biannual program, DOTE is currently wrapping up a 4-year Vulnerable User Traffic Calming Program. This program utilized a one-time funding source allocated by City Council to provide funding to every neighborhood for implementation of a priority project adjacent to a school, park, or recreation area. Examples include the raised crosswalks installed this year in front of Oyler School in Lower Price Hill, Rothenberg Academy in Over the Rhine, and Kilgour School in Mount Lookout.

### **SUMMARY**

The Department of Transportation is committed to prioritizing the safety of vulnerable street users, such as children. Hundreds of improvements have been installed near schools in the last 5 years and DOTE will continue to include pedestrian generators such as schools in our scoring criteria for the competitive Traffic Calming Program.

Exhibit A  
All Crashes 2023 – 2025 and 1,000ft Buffers Around Schools
