## MOTION

**WE MOVE** that the Cincinnati Recreation Commission work with Cincinnati Public Schools to identify and provide a report of mutually beneficial recreation projects that would benefit students and all residents. This includes creating better access to existing facilities, fixing failing infrastructure, opening and restoring facilities that are currently closed, and exploring opportunities for new projects. This collaborative approach should focus on underserved neighborhoods where children, seniors, and all residents do not have equitable access to exercise and recreation opportunities.

## STATEMENT

As we tackle the problem of equitable access to recreation facilities and exercise for people in our city, we believe there are several opportunities for the Cincinnati Recreation Commission and Cincinnati Public Schools to collaborate. It is our intention that these two organizations will be able to identify the greatest need for their constituents by working together.
