Motion

WE MOVE that the Department of Transportation and Engineering provide a REPORT on suggestions and costs to provide attention-getting devices such as lights for crosswalks that exist on heavily travelled streets.

STATEMENT

Several weeks ago, a video was posted on social media showing students attempting to cross Harrison Avenue. Cars zoomed by, apparently unaware of the existence of the crosswalk or the students. The pedestrians were left in the dangerous position of standing in the middle of the crosswalk as cars sped by on both sides of them. It is unclear whether drivers were even aware of the crosswalk. This motion requests a report on what can be done to bring attention to crosswalks on busy streets.
