MOTION

WE MOVE for the City Administration to prepare a report on the fleet needs of the City of Cincinnati's Fire Department including the type and number of vehicles to be purchased, the cost, and the City funding source.

Councilmember Scotty Johnson

STATEMENT

This motion requests the City Administration to prepare a report in order for City Council to assess the fleet needs of the City's Fire Department. The information currently available indicates that the Fire Department has increased the number of vehicles leased and the number of older vehicles used, rather than purchasing needed vehicles. In addition, the size of the vehicles used in some cases creates difficulty in transporting necessary equipment.
