C & F Timeline

Next Steps

PURPOSE

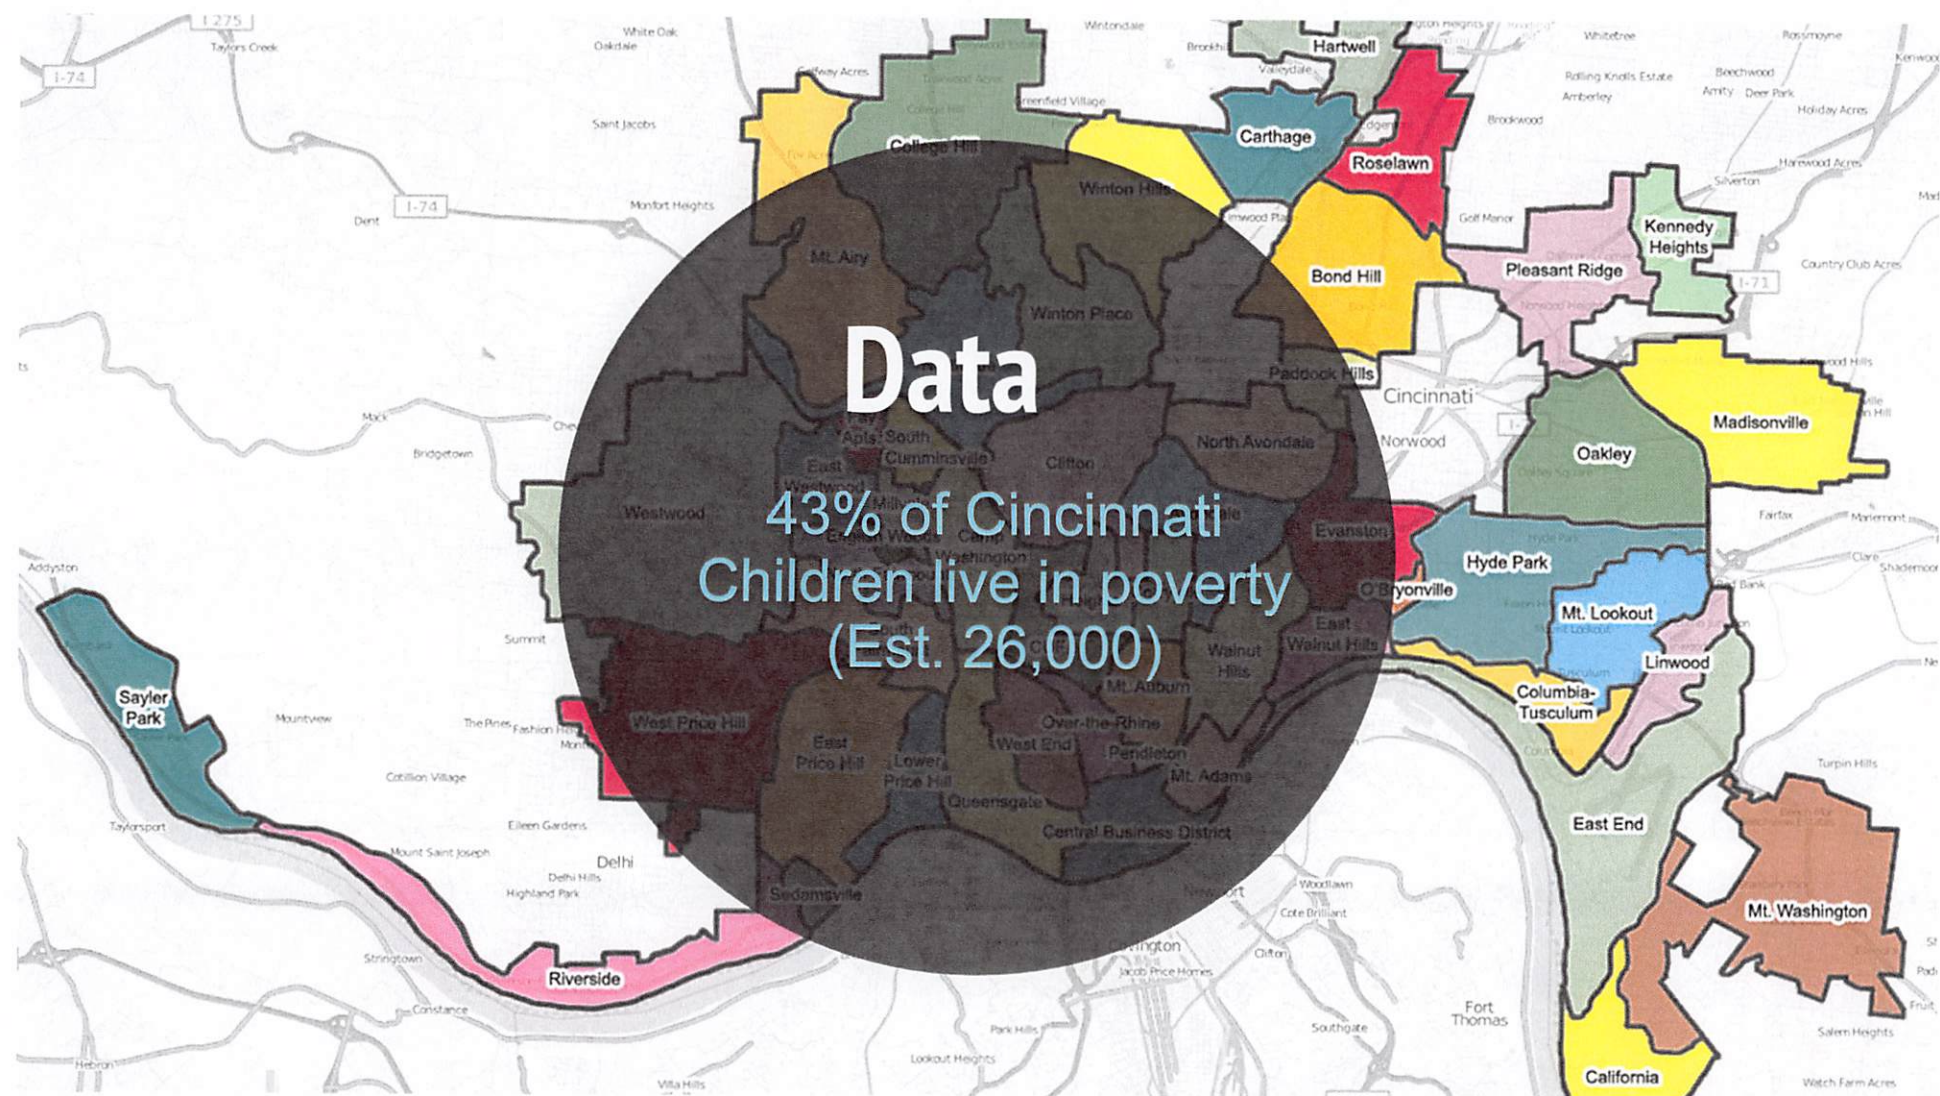

To advise the Mayor and Council regarding improving the lives of children and families in Cincinnati. To advise the Mayor and Council about policy initiatives and to measure and monitor data on the improvement of ***Safety(1), Housing(2), Health(3), Cultural and Societal Exposure(4), Career Opportunities for Children and Families(5).***

SRATEGIC PLAN

Establishing an Office of Children and Families.

- In 2020, we will formalize the Children and Families Cabinet, a group of department directors and external partners that will improve cross-sector efforts and investments to have a greater impact on our children and families.
 - Establishing an office in 2021 with minimal staff support and an investment of ~\$100,000 will help to accelerate and strengthen the progress that we must make on behalf of children and families
 - The original ordinance states a total of 11 voting members with 10 external members to include: 2 non-profit leaders, 2 funders, 1 parent, 1 youth, 1 CMHA, 1 SORTA, 1 Chamber, 1 AA Chamber
-

RESEARCH

Long Term Impacts

- 1 These children are more likely to experience multiple family transitions, move frequently, and change schools.
- 2 The schools they attend are less well funded, and the neighborhoods they live in are more disadvantaged.
- 3 The parents of these children have fewer resources to invest in them and, as a consequence, their homes have fewer cognitively-stimulating materials, and their parents invest less in their education.
- 4 The stress of living in poverty and struggling to meet daily needs can also impair parenting.
- 5 Social and economic deprivation during childhood and adolescence can have a lasting effect on individuals, making it difficult for children who grow up in low-income families to escape poverty when they become adults.
- 6 Because the negative effects of deprivation on human development tend to cumulate, individuals with greater exposure to poverty during childhood are likely to have more difficulty escaping poverty as adults.

Data for this study come from the Panel Study of Income Dynamics (PSID), which collects information on the social and economic status of PSID families and their offspring every year. (National Center for Children in Poverty)
